

## **New MiniTec Profi-Team catalogues provide overview of modular conveyor systems for manufacturing, assembly and inspection lines**

**Basingstoke UK, September 2009.** MiniTec UK has released two new catalogues featuring its Profi-Team conveyor systems for assembly and inspection lines.

The System FMS is based upon an automated chain or band conveyors and the System RMS uses precision rollers. Both systems are fully modular and include work-piece carriers, transfer units, diverters, positioners, lifts and drive units plus a wide selection of ancillary components to make customisation straightforward. The main aim of the new catalogues is to present a graphical and dimensional overview showing the enormous opportunities offered for handling components and assemblies of all sizes for modern high-throughput production and assembly.

The Profi-Team System FMS and System RMS catalogues are available from MiniTec UK in hard copy or in downloadable PDF format from the [www.minitec.co.uk](http://www.minitec.co.uk) website
